NWA WOOD DESIGN

Solid wood table care

Keep this reference with your table details. These everyday instructions come from the shop's published care FAQ and warranty.

At the table

- **Spills.** Wipe them up right away rather than letting liquid stand on the wood.
- **Drinks.** Put a coaster under each drink to protect the finish from water rings.
- **Hot dishes.** Set serving dishes on trivets. Keep the table away from direct heat.

In the room

Keep the table indoors. Avoid damp or very dry spaces, harsh cleaners and dragging the furniture. Solid wood can expand or shrink as the seasons change. Small gaps that come and go can be a normal part of that movement.

For your particular finish

Ask Jeff how to look after the finish on your table. Write down the finish name and the instructions he gives you so they are easy to find later.

Care notes from Jeff

If you notice a problem

The shop asks for your name, when the table was delivered and photos of the issue. Contact Jeff at jeff@nwawooddesign.com. The published warranty gives the coverage and exclusions.
